IN THE CLAIMS:

This listing of claims will replace all prior versions, and listing of claims, in the Application.

Listing of claims:

1.   (Original) A method of executing a monolithic application program on a grid computing system comprising the steps of:

executing the program on a computer on which the program has previously successfully executed;

monitoring the execution of the program to collect runtime information of the program;

providing a computer system on the grid computing system on which the program is to be executed with the runtime information of the program; and

executing the program on the computer system on the grid computing system.

2.   (Original) The method of Claim 1 wherein the runtime information includes file systems that are accessed by the program.

3.   (Original) The method of Claim 1 wherein the runtime information further includes files that the program links or loads in memory.

Appl. No. 10/666,791
Response to Office Action dated 02/27/2008
Reply to Office Action of 11/27/2007

4.   (Original) The method of Claim 1 wherein the runtime information is provided while the program is being executed on the grid computing system.

5.   (Original) The method of Claim 1 wherein the runtime information is provided before the program is being executed on the grid computing system.

6.   (Original) A computer program product on a computer readable medium for executing a monolithic program on a grid computing system comprising:

code means for executing the program on a computer on which the program has previously successfully executed;

code means for monitoring the execution of the program to collect runtime information of the program;

code means for providing a computer system on the grid computing system on which the program is to be executed with the runtime information of the program; and

code means for executing the program on the computer system on the grid computing system.

7.   (Original) The computer program product of Claim 6 wherein the runtime information includes file systems that are accessed by the program.

Reply to Office Action of 11/27/2007

8.   (Original) The computer program product of Claim 6 wherein the runtime information further includes files that the program links or loads in memory.

9.   (Original) The computer program product of Claim 6 wherein the runtime information is provided while the program is being executed on the grid computing system.

10.   (Original) The computer program product of Claim 6 wherein the runtime information is provided before the program is being executed on the grid computing system.

11.   (Original) An apparatus for executing a monolithic program on a grid computing system comprising:

means for executing the program on a computer on which the program has previously successfully executed;

means for monitoring the execution of the program to collect runtime information of the program;

means for providing a computer system on the grid computing system on which the program is to be executed with the runtime information of the program; and

means for executing the program on the computer system on the grid computing system.

12.   (Original) The apparatus of Claim 11 wherein the runtime information includes file systems that are accessed by the program.

Reply to Office Action of 11/27/2007

13.   (Original) The apparatus of Claim 11 wherein the runtime information further includes files that the program links or loads in memory.

14.   (Original) The apparatus of Claim 11 wherein the runtime information is provided while the program is being executed on the grid computing system.

15.   (Original) The apparatus of Claim 11 wherein the runtime information is provided before the program is being executed on the grid computing system.

16.   (Original) A system on a grid computer system comprising:

at least one storage device for storing code data; and

at least one processor for processing the code data to execute the program, the code data including runtime information for enabling the program to successfully execute on the grid computing system, the runtime information having been collected while the program is executed on a computer on which the program has previously successfully been executed.

17.   (Original) The system of Claim 16 wherein the runtime information includes file systems that are accessed by the program.

18.   (Original) The system of Claim 16 wherein the runtime information further includes files that the program links or loads in memory.

Reply to Office Action of 11/27/2007

19. (Original) The system of Claim 16 wherein the runtime information is provided while the program is being executed on the grid computing system.

20. (Original) The system of Claim 16 wherein the runtime information is provided before the program is being executed on the grid computing system.
